The earth, the air, the land and the water are not an inheritance from our forefathers but a loan from our children. So, we have to handover to them, atleast as it was handed over to us.

– M.K. Gandhi

join hands with IWE for sustainable future

INSTITUTION OF WATER & ENVIRONMENT (INDIA)

committed to safe water & sustainable environment....

the institution

In an era, where 'global warming' has become a 'global warning', the entire world is facing a great threat for safe and sustainable future for the Gen-Next. Protection and conservation of water and environment are very critical areas of present times and not only engineers, but the environmentalists, scientists, agriculturists, NGOs and even managers will have to play a vital and critical role to combat the threat against mankind's future by promoting and adopting innovative technologies related to water and environment.

With this scenario as the backdrop, the **Institution of Water & Environment (India)** has been established as a professional society to meet new challenges in the sector. It will comprise of professional engineers, scientists and experts, involved in the field, to provide a vast array of technical, professional and support services to the government, development agencies and industries along with the academic institutions and engineering community through a variety of technical activities, functions and active consultations.

Institution of Water & Environment (India) is constituted to serve the communities in enhancing the water security, safe sanitation and environment protection by a creative and constructive process utilising scientific advancements, knowledge, expertise and experience.

The Institute, which is a group of experienced and knowledgeable engineers, environmentalists, economists, urban planners, and scientists from water and environmental engineering sector, is registered under Societies Registration Act XXI of 1860.

the vision

To associate in a global effort, where every human being would have access to clean drinking water and healthy environment.

the mission

Dissemination of information and sharing of knowledge on best practices related to technological and managerial advancement in the fields of water engineering, sanitation and environmental engineering including social and other related fields.

the activities

The Institution shall have diversified spectrum of activities like organising seminars, technical lectures, workshops, conferences, research, tours, publications, formation of resource centre and other activities of interest, related with the water supply, sewerage and environmental engineering.

JOIN IWE TO REACH THE PLANNERS, INSTITUTIONS, EXECUTION AGENCIES

the objectives

The Institution has conceived wide range of objectives as, 'agenda for action' to convert the ideas of vision, mission and objectives of IWE into action. While many actions are required to be taken in many directions, here are some of the objectives which the Institution intends to undertake –

- To acquire, promote and advance knowledge, skill and expertise within the engineering sector in India.
- To disseminate information, knowledge and ideas on all matters, affecting these sectors amongst its members.
- To make available expert technical support and services in planning, designing, preparation of DPRs, supervision, appraisal, evaluation and monitoring, quality control etc.
- To advance the science and practice of water and environment for the public at large.
- To encourage people's participation and create awareness about water and environment conservation amongst the end-users.
- To make available expert technical support all over the country for capacity building and skill development.
- To encourage educate, train and undertake research for conservation of rain water by rain water harvesting systems.
- To serve as a centre of excellence for acquisition and promotion of objects mentioned above and dissemination of latest technical, managerial and financial knowledge, related to the sector amongst the beneficiaries.
- To advocate the views and interests of the sector and the profession, before various committees appointed by government, semi-government, local authorities, professional bodies, educational institutions etc.
- To assess into the conditions/status for perspective planning pertaining to the sector.
- To provide services for digitisation of existing infrastructure related to the sector along with evaluation of assets and inventory.
- To provide services for accreditation of Water Works, Sewage/Effluent Treatment Plants, Laboratories and Potable Water and Packaged Drinking Water.
- To foster possible interest in and understanding of water and environment matter, demonstration of leadership and develop brand and exclusive identity.
- To provide services for preparation of draft Schedule of Rates and manual for construction, operation and maintenance of projects related to the sector.
- To provide services for preparation of guidelines for consultants and certification of consultants.
- To provide services for arbitration, environmental audit, impact assessment of projects related to the Sector.
- To serve as a R&D Centre to develop an innovative and cost-effective technology and products and to provide expertise to technical institution to promote education, training, study and research in these sectors.

role of IWE

Widening the networking of players in the field of water & environment

Addressing the concern related to water and Environment industry

Thinking Global and acting local approach to meet the challenges.

Expert advice on techno commercial issues affecting the industry.

Research& Development for mitigating the ecological challenges

&

member's privileges

Exchange of ideas and sharing of knowledge with fellow members.

News & Views on the world of water & Environment from the world over.

Voicing of ideas through research papers, articles and IWE journals.

Interaction opportunity with subject experts from the field.

Receive technical journals of IWE & other publications free of charge periodically.

Opportunity to participate at international conferences.

Networking opportunities with the decision makers from the industry

Meeting with focused groups for share and learn related field.

Environment & water related information from IWE headquarters.

Nomination for IWE award /recognition facilitation.

Technical e-debate / discussion with fellow members
