Regn. No. S-II/150/Distt.South-East/16.12.2013

INSTITUTION OF WATER & ENVIRONMENT (INDIA)

committed to safe water & sustainable environment....

"A new Vision for Earth-Restore Land, Revive Soil & Reimagine the Future"

"Our Land, Our Future"

TAKE ACTION NOW

Save SOIL	Save NATURE	Bring back Greenery	Save WATER
• Some foods can actually help repair soil. Try including more pulses in your diet like beans, lentils, chickpeas, and peas • Learn about sustainable agriculture practices that preserve soil health, retain water and minimise erosion • Include regional, seasonal and plant-rich foods in your meals.	• The way we consume food is driving over 80% of biodiversity loss. • Boosting conservation • Live with nature by changing lifestyle • Preserve Water bodies, such as lakes, ponds, and wetlands to alleviate deadly climate induced heat waves and increase biodiversity. • Restore Ecosystems on Land and water bodies.	• Collect kitchen waste to use as compost in garden, plant pots in balconies or contribute to composting schemes. • Growing trees alongside streets, roads can lower the maximum temperature in the cities up-to 5 degrees Celsius • Volunteer time & labour and contribute to the rehabilitation.	• Turn off your tap/faucet while you lather your hands • Install low flow cistern • Place a filled up plastic bottle inside cistern to reduce the flush volume • Take bath with bucket • Use aerators in Tap/faucet • Use bar soap instead of shower gel • Wash only when full load with washing machines.

Everyday should be Environment day. BE COMMITTED TO SAVE ENVIRONMENT
